

VAMSI KRISHNA VANGALA

Global Technology, Data & Operations Enablement Leader | Technical Product Owner & AI/ML Strategy Expert

+91-9515296987 · vangala.vamsik@gmail.com · linkedin.com/in/vangalavamsik · PGDM (MBA) – International Business & Marketing

COMPANIES WORKED WITH

- Verizon Data Services Pvt Ltd
- Oracle India Pvt Ltd.
- Savi Technologies Inc.
- Capgemini America Inc.
- Capgemini Technology Services India
- QuickStart Global Pvt Ltd. & Clearcell India Pvt Ltd.

EDUCATION

Bachelor of Science in Physics — University of Mumbai, India

PGDBM (MBA), International Business & Marketing — Balaji Institute of International Business, India

PERSONALITY TRAITS

Adaptability

Strategic Planning

Courteous Demeanour

Sharp Problem Solving

Time Management

CLIFTONSTRENGTHS

Maximiser · Adaptability · Ideation · Arranger · Relator

AWARDS & RECOGNITION

- Recognizing You – Accountability (2025)
- Recognizing You – Accountability (2023)
- Teamwork (2022)
- Customer Excellence (2022)
- Personal Commitment (2021)

ACCOMPLISHMENTS

Appreciation from C-level suite on demo video presentation on features

TRAININGS

Management Trainee — Apeejay Insurance Service Pvt Ltd, Kolkata, India (Mar 2006 – Nov 2006)

- Managed Corporate Sales (General Insurance)
- Handled entire client portfolio
- Coordinated with senior management to understand

PROFILE SUMMARY

Strategic technology leader with 18+ years of experience directing data analytics portfolios, pioneering Generative AI/LLM integrations, and implementing enterprise data strategies. Skilled in building resilient cloud-based data environments and semantic layers to power trusted analytical pipelines. Demonstrated success in leading Product Design Operations, establishing clear delivery cadences, and simplifying complex technical options to influence executive-level stakeholders.

- **Global Technology & Operations Leader** with over 18 years of experience spearheading data strategy, AI/ML enablement, and digital transformation initiatives across large-scale enterprise environments.
- **Strategic Product Portfolio Owner** with a proven track record of managing product roadmaps and enablement agendas that drive business value, successfully delivering initiatives contributing over \$50M in efficiency and cost-reduction.
- **Expert in AI/ML & Advanced Analytics Enablement**, experienced in transitioning predictive models and applied AI (including Generative AI/LLMs) from experimental phases into robust, responsible, and secure business-facing decision products.
- **Cross-Functional Collaborator & Influencer** adept at translating complex business objectives into structured capability-building plans, aligning diverse technical teams with security, privacy, and architecture standards.
- **People & Delivery Leader** with a strong history of building and coaching high-performing, agile engineering and data science teams in a global capability center model, fostering a culture of ownership and delivery excellence.

PROFESSIONAL EXPERIENCE

Principal Engineer – Systems Analysis, ML Product Owner

Oct 202

Verizon Data Services Pvt Ltd., Hyderabad, India

- **Enablement & Platform Strategy:** Set the tactical direction for AI/ML and advanced analytics frameworks, managing a complex intelligence ecosystem to ensure scalable, high-performance customer-centric personalization engines.
- **Product Management & Delivery:** Acted as Product Owner to manage end-to-end product lifecycles, balancing backlog prioritization, tracking metrics, and driving cross-functional alignments to deliver features contributing over \$50M in business benefits.
- **AI/ML Scalability:** Led the operational deployment and tuning of ML models in production environment, streamlining OMNI-channel data assets to reduce customer friction and divert over 3.3M service calls annually.
- **Governance & Cross-Functional Collaboration:** Partnered closely with architecture, security, and digital channel partners to enforce data quality standards, model transparency, and robust system integration.
- **Team Leadership & Agile Culture:** Managed and mentored high-performing, cross-functional Agile squads, establishing structured delivery cadences (sprints, epics, and documentation) while translating ambiguous requirements into clear development roadmaps.

Product Manager, Hospitality

Mar 2019

Oracle India Pvt Ltd., Hyderabad, India

- **Current State & Capability Mapping:** Engaged with Global Strategy Leaders, Pre-Sales, and Solution Managers to perform market requirement analyses and translate business data needs into concrete Product Feature Roadmaps.

requirements	● Pilot & MVP Operationalization: Successfully pioneered and operationalized the industry's first automated AI Room Assignment system, taking the data capability from concept through sprint planning, MVPs, and global deployment. ● Technical & Architecture Collaboration: Designed detailed functional and product specification architecture blueprints to guide UI/UX, engineering, and data testing teams in executing advanced algorithmic solutions. ● Decision-Support Products: Owned the product roadmap and led the development of a pioneering, AI-driven automation product (OPERA) that streamlined business processes and optimized cost/performance tradeoffs. ● Stakeholder Influence & Delivery: Led Agile sprints and backlog grooming sessions, authoring detailed functional specifications to bridge technical execution with core business objectives. Data Scientist Oct 2017 Savi Technologies Inc., Tampa, FL ● Data Ecosystem & Assets: Designed and managed cloud-based DataMarts (Azure) to store, clean, and integrate complex marketing and transaction data assets, establishing reusable data pipelines. ● Predictive Solutions: Developed and deployed automated machine learning models and fraud detection engines that successfully secured over \$3.5M in potential losses. ● Strategic Capability Scaling: Evaluated emerging technology trends and data capabilities to advise executive decision-makers on scalable predictive intelligence investments. Data Scientist Jun 2017 Capgemini America Inc. ● Analytical Standardization: Implemented advanced statistical modeling, time-series forecasting (ARIMA), and predictive methodologies to optimize complex broadcast systems. ● Data Usability: Developed custom analytical frameworks and data preprocessing techniques to transform unstructured data streams into actionable, visual business dashboards. Product Manager / Data Scientist / Project Manager Jul 2014 Capgemini Technology Services India ● Portfolio Leadership: Led a 12-member predictive modeling and product development team to standardize and classify projects based on revenue, scale, and strategic business value. ● Process Optimization: Combined predictive modeling systems and supervised learning algorithms to automate fraud detection and improve data quality across complex database architectures. Sr. SAS Analyst Dec 2006 QuickStart Global Pvt Ltd. & Clearcell India Pvt Ltd. ● Requirements Gathering & Gap Analysis: Collaborated directly with business unit representatives to define raw data requirements, perform current-state analysis, and suggest structural data modifications to support advanced customer profiling and market basket segmentation.
